

Rohan Singh

(650) 935-0809 | rohans9@uci.edu | linkedin.com/in/rohan123 | github.com/rohan1234usa

EDUCATION

University of California, Irvine

Expected Grad: **June 2027**

B.S. in Computer Science (GPA: 3.89) | Dean's Honor List (All Quarters)

Irvine, CA

Coursework: ML & Data Mining, AI, Information Retrieval, Data Structures, Operating Systems, Linear Algebra **AI/CV:** RAG, Gemini Pro, PyTorch, YOLOv8, OpenCV, ByteTrack, BoT-FaceSORT, TensorFlow **Tools & Platforms:** Firebase, Vertex AI, Vercel, Docker, Android SDK, Git, GCP, AWS, Unit Testing **Certifications:** Advanced ML with TensorFlow, Google Cloud Generative AI Leader

EXPERIENCE

AI/Machine Learning Intern

June 2025 - Sept 2025

Imentiv AI

Cupertino, CA

- Boosted face detection and recognition accuracy by 6% via an automated ground-truth validation pipeline, directly optimizing production YOLO models
- Implemented a face re-identification mechanism using dynamic placeholders to maintain consistent tracking, validated against ByteTrack and BoT-FaceSORT
- Conducted comparative evaluations that influenced the engineering team's decision to migrate from legacy models to updated YOLO architectures

AI/Machine Learning Intern

June 2024 - Sept 2024

Imentiv AI

Cupertino, CA

- Engineered an image deduplication pipeline, using DINOv2 and Faiss to filter 95% similarity redundancies
- Developed an algorithm to identify and extract distinct video frames for dataset diversity
- Built a facial analysis tool using YOLOv8 to detect faces, create bounding boxes, and label emotions

Software Engineer Intern

June 2023 - Aug 2023

Asterbyte Software Systems Pvt Ltd

Remote

- Designed and implemented a machine learning solution for emotion detection on human faces in videos and images
- Engineered mobile application "Hue Christmas" for Philips Hue and reconstructed/optimized "Pitch Prime"
- Conducted research on emotion recognition and published findings at WCSET 2023 and IRAJ 2023

PROJECTS

Behavioral Interview Coach

December 2025

Python, FastAPI, Imentiv AI, Docker, AWS S3

- Architected a 'Soft-Skills First' analysis engine designed to quantify non-technical traits (confidence, eye contact, pacing), filling the critical feedback gap left by technical platforms like LeetCode
- Created a real-time interview simulation replicating high-pressure screenings in a low stakes environment
- Developed a CV pipeline that isolates delivery from content, generating a unified objective performance score

SikhAI

July 2025

Next.js, Firebase, Vertex AI, Tailwind CSS, Google Gemini

- Developed a RAG-based chatbot to provide spiritual guidance rooted in Sikh teachings
- Engineered a full-stack community platform featuring Firebase Authentication for a Seva volunteer event organizer
- Built an accessible, high-performance Shabad search engine for the Sikh community using Next.js
